Charlotte Round, MA Art and Design: Interdisciplinary Practices  
*Introspective Voyeur*

---

Introspective Voyeur is an interactive piece of work that attempts to show that voyeurism is an innocent part of our everyday lives. To be a voyeur you are looking, watching, observing for sexual pleasure, or so the current definition says. This piece of work encourages the viewer to cross that line. Gaze on through those windows. Push past that reaction to look away. After all, isn't it something we do every day? Isn't social media just another window? Just this time it's digital.

a lighter meaning. Today's technology allows us to spend hours watching lives online. When you spend so much time watching friends, family and celebrity's online we forget to focus on ourselves and sometimes get lost.
