Noumena

'Noumena' and its installation 'Uzumaki' seek to challenge the sensible and optimistic by visualizing a gateway into the noumenal world through dark surrealist portraiture. 'Noumena' is about exhibiting the potential of horror media through contemporary philosophical and artistic representation, as a genre infatuated with the otherworldly and unimaginable, and infamous for its mercilessness against the dogmatic attitudes of humanity's self-assumed superiority in the face of nothingness.

This project and its resolutions exist as the natural progression of new age pessimism and its emergence within post-modern art. 'Noumena' represents the future of intellectual horror discourse within contemporary academia, media and art.
